

## Guidance on the use of chemicals on AURORA

- Include a list of packed chemicals.
- A material safety data sheet must be included for each chemical.
- These documents are handed to the skipper.
- Chemicals should be stored safely and securely packed on board the ship in the dedicated chemicals cabinet.
- For each chemical, safety instructions/data sheets should be available in Danish and English and put in the manila folder hanging on the door to the chemicals cabinet.
- All chemicals must be removed from the ship at sign-off unless otherwise agreed with the skipper.
- In case of large quantities of chemicals, it must be arranged with the skipper where to store these on board.
- All chemical waste must be removed from the ship at sign-off.
- Bring along slump bottles and bins for disposal of needles and sharp objects.
- Remember transport documents to and from the ship.

Transport documents can be obtained with Aarhus University's safety advisor:

<https://medarbejdere.au.dk/administration/hr/arbejdsmiljoe/fysiskarbejdsmiljoe/kemi-og-biologi/sikkerhedsraadgiverfunktionen/>

Email: [Sikkerhedsraadgiver@au.dk](mailto:Sikkerhedsraadgiver@au.dk)

The transport document is valid on the way to the ship, aboard the ship and from the ship, and skipper must have a copy of the document.
